SUMMARY:

3rd yr BIT (Mobile app dev)Student
Passionate about creating innovative Android applications that solve real-world
problems. With a strong foundation in Kotlin and Java, I strive to deliver high-quality, user-friendly mobile
experiences.

PROFESSIONAL SKILLS:

programming Languages
- Kotlin
- Java
- c#
- JavaScript
- Swift

Technologies
- Jetpack
- XML
- Firebase
- Android Sdk
- Room Database
- Retrofit
- React
- Git
- Restfull APIs
- .NEt

EDUCATION

Bachelor of Information Technology (Mobile App Development)

Academy of Interactive Technology, Sydney, Australia

Projects:

Art Gallery (Link)
- Dynamic platform designed for digital artists and art enthusiasts.
- Space where users can showcase their artwork, engage with other artists, and explore a diverse range of digital creations.
- Google account authentication and Firebase backend.

Wealth Guard (Link)
- Wealth Guard is an app designed to help users track and manage their finances.
- Users can record their income and expenses, which are visually displayed in a bar graph to compare income versus expenses.
- Data is stored in a Room database for persistence.

cameraX (Link)
- Camera X is an advanced camera application that leverages the power of Android's CameraX library to provide a superior photography experience.
- Camera X interacts directly with the camera hardware, offering enhanced control and performance.
